## Binary Classification

# Binary Classification

$X = \begin{bmatrix} 255 \\ 231 \\ \vdots \\ 255 \\ 134 \\ \vdots \end{bmatrix}$

$64 \times 64 \times 3 = 12288$

$n = n_x = 12288$

$X \longrightarrow y$

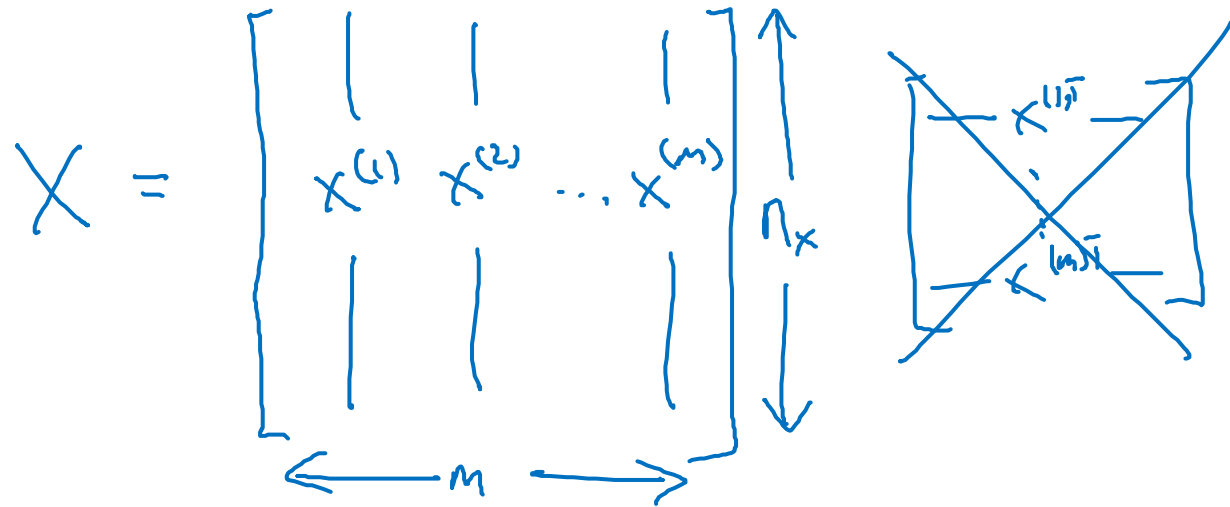

# Notation

$$(x, y) \quad x \in \mathbb{R}^{n_x}, y \in \{0, 1\}$$

$$m \text{ training examples} : \{(\underline{x}^{(1)}, \underline{y}^{(1)}), (\underline{x}^{(2)}, \underline{y}^{(2)}), \dots, (\underline{x}^{(m)}, \underline{y}^{(m)})\}$$

$$M = M_{\text{train}}$$

$$M_{\text{test}} = \# \text{test examples.}$$

The diagram shows a matrix  $X$  with columns labeled  $x^{(1)}, x^{(2)}, \dots, x^{(m)}$ . A horizontal double-headed arrow below the columns is labeled  $m$ . A vertical double-headed arrow to the right of the rows is labeled  $n_x$ . To the right of matrix  $X$  is a square matrix with a large 'X' drawn over it. Inside this square, the top row is labeled  $x^{(1)}$  and the bottom row is labeled  $x^{(m)}$ .

$$X \in \mathbb{R}^{n_x \times m}$$

$$X.\text{shape} = (n_x, m)$$

$$Y = [y^{(1)} \ y^{(2)} \ \dots \ y^{(m)}]$$

$$Y \in \mathbb{R}^{1 \times m}$$

$$Y.\text{shape} = (1, m)$$
